PROFESSIONAL EXPERIENCE

Software Engineer | GfK by NielsenIQ (NIQ) | Pune, India

(Jun 2025 - Present)

GfK Newron – Platform delivering sales and market insights across FMCG, technology, and durables.

- Developed scalable and reusable UI components using React and TypeScript for charts, tables, and KPI dashboards used across multiple modules.
- Contributed to **design system adoption** by aligning UI components with shared libraries and standardized UI patterns, improving consistency across the platform.
- Supported **migration of legacy charting components into centralized component libraries**, increasing reuse and reducing duplication.
- Improved code quality by resolving SonarQube issues, reducing code smells and improving maintainability across the codebase.
- Increased unit test coverage for critical workflows using Jest and React Testing Library, contributing to a reliable testing strategy and reducing regressions.
- Contributed to **CI/CD pipelines** by supporting integration of static analysis, security scans (Trivy, secret scanning), and automated quality checks.
- Supported **React 18 upgrade and blue-green deployment strategy**, improving release reliability and performance.
- Enhanced export-to-Excel functionality for selected UI data, improving usability for business users and reporting workflows.
- Collaborated with product, design, and QA teams to improve user experience and platform consistency, contributing to NPS improvement initiatives.

Senior Developer | Rayden Interactive | Pune, India

(Dec 2024 – May 2025)

Healthcare platform for real-time remote patient monitoring.

- Built modular and reusable UI components using React and TypeScript, improving development efficiency by 30%.
- Designed scalable frontend architecture for handling real-time data and complex UI workflows.
- Integrated GraphQL APIs, reducing data load time by 45% and improving performance.
- Applied TypeScript best practices and coding standards, reducing production defects by 10–20%.
- Delivered end-to-end features in collaboration with cross-functional teams (design, backend, QA).
- Implemented accessibility standards (WCAG/Section 508), ensuring compliance and improved usability.
- Contributed to **component standardization and consistent UI patterns** across the application.

Experience Engineer L2 (Frontend) | Publicis Sapient | Pune, India

(Apr 2022 – Dec 2024)

E+ Platform – Workforce management and staffing insights platform.

- Led frontend development using Next.js and React for a platform used by 50+ teams globally.
- Implemented **component-driven development using Storybook**, improving component reuse, documentation, and UI consistency.
- Improved API efficiency by 25% using GraphQL and Apollo Client.
- Built data-intensive dashboards using Ag-Grid, Chart.js, and Plotly.
- Achieved 95% code coverage using Jest, React Testing Library, and Playwright, reducing critical bugs by 25%.
- Participated in **code reviews and enforced coding standards**, improving overall code quality.
- Automated development workflows to improve team productivity and release cycles.
- Provided production support and resolved high-priority issues with minimal downtime.

Enterprise compliance tracking platform.

- Developed responsive web applications using React, Redux, and Bootstrap for 2,000+ users.
- Built reusable UI components to improve consistency and development speed across modules.
- Reduced bug turnaround time by 50% through structured unit testing using Jest.
- Applied secure coding practices to mitigate XSS and CSRF vulnerabilities.
- Followed clean code principles, modular design, and test-driven development (TDD).
- Maintained high application stability and client satisfaction through timely delivery and fixes.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, TailwindCSS, Material UI, Redux, Angular

Design Systems & UI: Design systems, component libraries, reusable components, Storybook, UI standardization, accessibility (WCAG)

Testing: Jest, React Testing Library, Playwright, unit testing, integration testing

CI/CD & Code Quality: Git, CI/CD pipelines, SonarQube, static analysis, code coverage, security scanning

APIs & Data: GraphQL, REST APIs

Other: Node.js (basic), Python, Java, Azure Cosmos DB, Generative AI tools

EDUCATION

Ramdeobaba College of Engineering and Management, Nagpur, Maharashtra

B.E (Computer Science & Engineering) - 7 CGPA (*Aug' 2015 - May 2019*)

- **Projects:** RTO Challan Management System, Sahayak (accident alert Android app), AI-based ChatBot
- **Courses:** DSA, Algorithms, OS, DBMS, CN, TOC, Compiler Design, Java OOPs, Project Management

CERTIFICATIONS & ACTIVITIES

- **Udemy - React & TypeScript - The Practical Guide - (2024)**
- **AWS Certified Developer - Associate**
- **CTRL + hack + del inequality hackathon at Accenture (2021)**
- Developed a machine learning model based on the Random Forest Regression model and ranked #62 amongst 1000+ participants.
